SUBJECT: FDA Restrictions =20

[Message]

It is my understanding that the FDA is in the process of=20
altering laws to restrict the availability of many vitamins,=20
minerals and herbs by making some dietary supplements will be=20
come =93prescription only.=94 This action, if taken, will have a=20
dramatic effect on the health and well being of millions of=20
Americans who believe that a proactive approach to ones health=20
is more effective than "a wait until I get sick approach".=20
These new regulations will further serve to restrict access to=20
information about alternative health choices.=20

While, as a nation, we struggle with a solution to rising=20
medicare costs, the FDA, with this action, serves to retard=20
the growth of the one sure way to reduce health care=20
expenditures... maintaining good health and not get sick in=20
the first place In an era of rising health costs, informed=20
consumers have shown that the free flow of information on=20

98N-0044

C22311
4/23/1999/128B

health alternatives, and availability of vitamins, minerals and=20
herbs, a better quality of health can be maintained.=20

I am not against traditional medicine. In fact, I agree with=20
it for emergency care and surgical procedures, when necessary.=20
This FDA proposal will not serve the nation as a whole, but=20
will only line the pockets of the traditional medical=20
community and the large pharmaceutical companies.=20

Thank you
